

BPS-GUEST

Guest access is reserved for those needing temporary access to the district wireless network. Unlike BPS-SECURE, users joining BPS-GUEST must sign up for an access username and password.

1. Under your device's WiFi settings, find and select the BPS-GUEST network from the list of visible networks.
2. Your device should redirect to a web browser in order to complete the sign-in procedure.

TROUBLESHOOTING

- **If you have trouble connecting on a laptop computer**, try signing up for credentials on a mobile phone. Those credentials will also work on other devices.
 - **If you cannot get the sign-on screen to appear to enter your username and password or set up an account**, try opening the web address bps-ok.org in the web browser to see if that will trigger a redirect to an address starting with *ise01.bartlesville.k12.ok.us:8443/...* so you can enter your credentials or set up an account.
3. If you were given a username and password by the district, please enter that here. If you need a username and password, please click the link ***Don't have an account?*** to obtain one.
 4. If you are creating an account, fill out all of the requested information and then press **Register**. (SMS provider is the telecommunications company that handles your text messages.)
 5. You will receive an email and a text message with your username and password.

Account Created

Use the following information to sign on to the network.

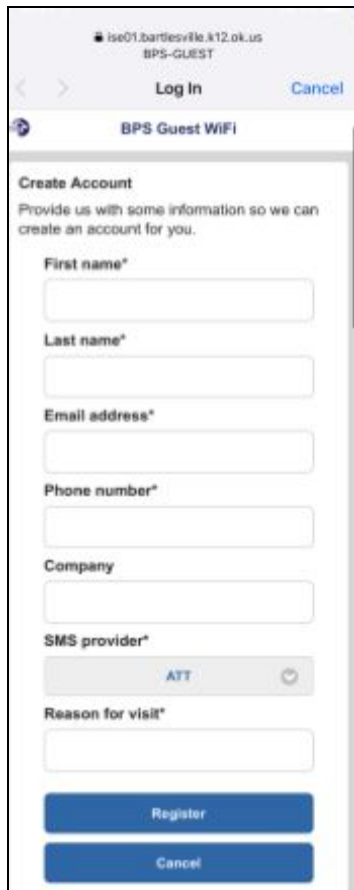

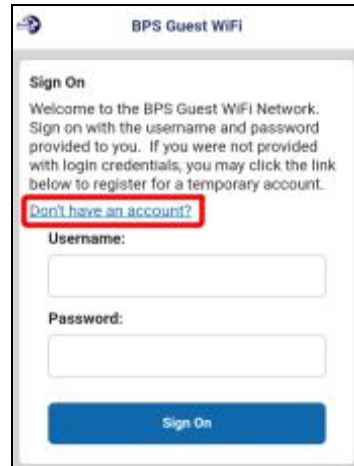

Username: User
Password: Password
First name: User
Last name: Name
Email: username@email.org
Phone number: 5555551234
SMS provider: <Provider>
Reason being... Test

[Print](#)

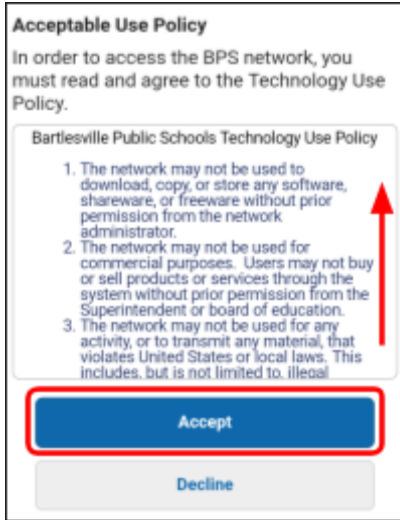

[Email Me](#)

[Text Me](#)

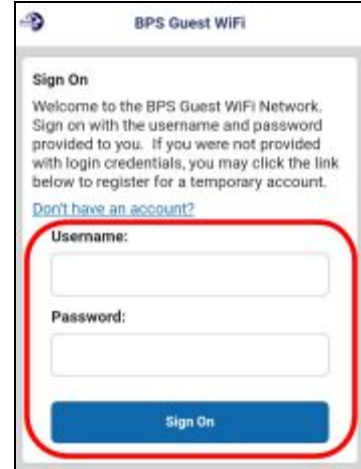

[Sign On](#)

- Use that information to sign in to the wireless network.
- Once signed in, review the *Acceptable Use Policy*, scrolling down to the very bottom so you can then click the **Accept** button.

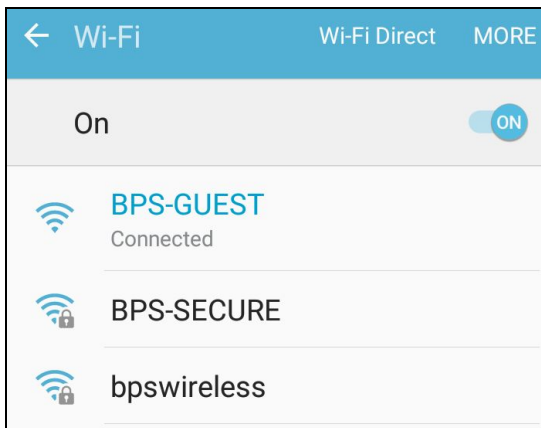

Scroll the text to the end of the Acceptable Use Policy so you can click the Accept button.

- You should see one of the screens below if your connection was successful:

ANDROID

APPLE

TROUBLESHOOTING

- **After connecting to BPS-GUEST on an iPad or iPhone**, you may seem to be “stuck” on the screen saying you now have Internet access through this network. Just open the web browser (e.g. Safari) and try to visit a website; if you are prompted to select a wifi network, select **BPS-GUEST** and it should connect and work.
- **If you have trouble connecting on a laptop computer**, try signing up for credentials on a mobile phone. Those credentials will also work on other devices.
- **If you cannot get the sign-on screen to appear to enter your username and password or set up an account**, try opening the web address bps-ok.org in the web browser to see if that will trigger a redirect to an address starting with [ise01.bartlesville.k12.ok.us:8443/...](http://ise01.bartlesville.k12.ok.us:8443/) so you can enter your credentials or set up an account.

After you see the above screen, try opening the Safari web browser. If it prompts you to select a network, tap **BPS-GUEST and you should be connected.**
